Notice to Fish Harvesters

2025 PRINCE EDWARD ISLAND CATCH AND RELEASE BLUEFIN TUNA SEASON

Charlottetown, PEI – June 26, 2025 - Fisheries and Oceans Canada (DFO) today announces that the 2025 Prince Edward Island (PEI) catch and release bluefin tuna season will open July 1, 2025 and end on October 31, 2025.

MANAGEMENT MEASURES:

Management measures remain unchanged from the 2024 season and are reflective of the National Guidelines for the bluefin tuna catch and release fishery.

DFO would like to remind fishers of the requirement to fill out a log sheet after **each fishing trip** and to submit the log sheets weekly to the DFO Area Office as per the instructions on the licence conditions. This information is mandatory for our science reporting obligations to ICCAT.

Fishers are also reminded to forward a copy of any recent Transport Canada certification (blue decal) renewals to Derrick Cummiskey at the DFO PEI Area Office (contact information below) as this is a requirement for licence issuance.

Mackerel Bait

Licence holders are permitted to catch and retain 20 live mackerel per fishing trip for bait purposes. This will be reflected in conditions of licence.

Hail Out

The licence holder/operator must contact Fisheries and Oceans Canada's contracted Vessel Hail System "Answer 365" at 1-833-699-2013 or at 1-506-431-3223 (satellite phone only) at least three (3) hours before departing for each fishing trip.

REQUIRED TRAINING: Mandatory training on safe fish handling is required for fishers to take part in this fishery. During 2023, DFO undertook training for the existing Catch and Release fisher fleet. New fishers who have yet to do this training must register with DFO for the required training. DFO will coordinate and administer the training for these fishers. Licence conditions will only be issued once the training is complete.
