Fall Herring Fishing Area 16G

**Multi-year Release of Excess Herring & Herring Fishery Catch
Information**

Hello,

This is to inform you that the Fall Herring Fishing Area 16G Overage Program will proceed as usual for 2019. I have attached an updated 2019 waiver for new harvesters and for new buyers in the herring fishery. These waivers are multi-year, so for buyers and harvesters who have signed them in previous years, the waivers remain valid.

Please note that the daily catch limit for the 2019 Fall Herring fishery in area 16G remains at 15,000 pounds per vessel. The fall 16G fishery is scheduled to start on Sunday, September 8th. If you have any questions please contact me.

Regards,

Lois Costello
Program Coordinator
