# Please release tagged crabs

DFO scientists are currently studying crab movements in Malpeque Bay. If you catch a crab with an acoustic transmitter on it, please release the animal where you caught it. For any information or to report your catch (when possible, with the crab ID number and position), please contact Annick Drouin: [annick.drouin@dfo-mpo.gc.ca](mailto:annick.drouin@dfo-mpo.gc.ca) , 418-775-0582

**Thank you for your collaboration**
